the bestselling author of the bottom billion returns to examine the fate of the poorest regions of the world some of which exist in the richest nations since the 1970s the western consensus in economic policy has been governed by the assumption that any poor area a city a state or even an entire country will find a way to progress through market forces if local economies fail to revive and market shifts have made a location unsuited to business needs the workforce can and should relocate to more prosperous locales either way no outside intervention is necessary one way or another the problem will work itself out except it doesn't using examples of the left behind regions renowned development economist paul collier shows that centralized western economies have been the most ineffective to alleviate poverty even if nationally the country seems to be growing south yorkshire once a hub of the steel industry is now the poorest region in england from the united states to japan zambia to colombia regions and nations experiencing economic decline find themselves with little recourse ignored by the powers that could come to their aid in left behind collier examines how this one size fits all hands off approach to economic policy has

devastated areas and nations all over the world and made society vastly more unequal with keen insight he draws lessons from such disparate fields as behavioral psychology evolutionary biology and moral philosophy to explain how we can adapt to the needs of individual economies in order to build a brighter and fairer global future

Paul Collier's contributions to development economics and in regard to Africa in particular have marked him out as one of the most influential commentators of recent times. His research has centred upon the causes and consequences of civil war, the effects of aid and the problems of democracy in low income and natural resource rich societies. His work has also enjoyed substantial policy impact, having seen him sit as a senior adviser to Tony Blair's Commission on Africa and addressed the General Assembly of the United Nations. This collection of Collier's major writings, with assistance from Anke Hoeffler and Jan Gunning and accompanied by a new introduction, provide the definitive account of a wide range of macroeconomic, microeconomic and political economy topics concerned with Africa. Within macroeconomics there is a focus on external shocks, exchange rate and trade policies, whilst microeconomic topics focus upon labour and financial markets as well as rural development. Collier's book 'The Bottom Billion' had become a landmark book and this summation of the research underpinning it will be a superb guide for all those concerned with African development.
